SUBJECT INDEX OF VOLUME 82*

Finite element and matrix methods

- On the use of hierarchical models in engineering analysis, K.J. Bathe,
N.-S. Lee and M.L. Bucalem (1–3) 5–26
- A discourse on the stability conditions for mixed finite element formulations,
F. Brezzi and K.J. Bathe (1–3) 27–57
- A posteriori error estimation, R.E. Ewing (1–3) 59–72
- Parallel computation with adaptive methods for elliptic and hyperbolic
systems, M. Benantar, R. Biswas, J. Flaherty and M.S. Shephard (1–3) 73–93
- The three R's of engineering analysis and error estimation and adaptivity,
O.C. Zienkiewicz and J.Z. Zhu (1–3) 95–113
- Factors affecting reliability of computer solutions with hierarchical single
surface constitutive models, C.S. Desai, G.W. Wathugala, K.G. Sharma and
L. Woo (1–3) 115–137
- The use of a priori estimates in engineering computations, B.A. Szabó (1–3) 139–154
- The problem of modeling the elastomechanics in engineering, I. Babuška (1–3) 155–182
- A posteriori error analysis in finite elements: The element residual method
for symmetrizable problems with applications to compressible Euler and
Navier–Stokes equations, J.T. Oden, L. Demkowicz, W. Rachowicz and
T.A. Westermann (1–3) 183–203
- A priori estimates for mixed finite element methods for the wave equation,
L.C. Cowsar, T.F. Dupont and M.F. Wheeler (1–3) 205–222
- Accuracy and adaptivity in the numerical analysis of thin-walled structures,
L. Plank, E. Stein and D. Bischoff (1–3) 223–256
- Framework for the reliable generation and control of analysis idealizations,
M.S. Shephard, P.L. Baehmann, M.K. Georges and E.V. Korngold (1–3) 257–280
- Mixed finite element methods for elliptic problems, D.N. Arnold (1–3) 281–300
- Adaptive finite element methods for diffusion and convection problems,
C. Johnson (1–3) 301–322
- A posteriori error estimates for the Stokes equations: A comparison,
R.E. Bank and B.D. Welfert (1–3) 323–340
- Predictor–corrector procedures for stress and free vibration analyses of
multilayered composite plates and shells, A.K. Noor, W.S. Burton and
J.M. Peters (1–3) 341–363
- Adaptive grids for coupled viscous flow and transport, K.C. Wang and
G.F. Carey (1–3) 365–383

* The issue number is given in front of the page numbers.

Structural mechanics

- Accuracy and adaptivity in the numerical analysis of thin-walled structures,
L. Plank, E. Stein and D. Bischoff (1-3) 223-256
- Predictor-corrector procedures for stress and free vibration analyses of
multilayered composite plates and shells, A.K. Noor, W.S. Burton and
J.M. Peters (1-3) 341-363

Supersonic flow

- A posteriori error analysis in finite elements: The element residual method
for symmetrizable problems with applications to compressible Euler and
Navier-Stokes equations, J.T. Oden, L. Demkowicz, W. Rachowicz and
T.A. Westermann (1-3) 183-203

Viscous flow

- A posteriori error analysis in finite elements: The element residual method
for symmetrizable problems with applications to compressible Euler and
Navier-Stokes equations, J.T. Oden, L. Demkowicz, W. Rachowicz and
T.A. Westermann (1-3) 183-203
- Adaptive grids for coupled viscous flow and transport, K.C. Wang and G.F.
Carey (1-3) 365-383
